

El Coronil, 6th November 2013

Hello!

Welcome to the English page of the web of IES. EL CORONIL.

Your teachers of English want to wish you a nice school year. We hope you will learn a lot, pass your exams, and enjoy the experience!

English is simple. If you work every day, English will be an easy subject but If you don't, it will be complicated. Remember we can help you with your problems and questions, but it is YOU that has to make the effort.

When you learn a language, you get access to a new culture, another people and a different way of life. It can become a beautiful experience. Somebody said when you speak two languages, you have got two hearts...and, in my opinion, your mind gets richer, too.

Apart from that, languages are very necessary today for many reasons, for example:

- 1) Some English-speaking countries are very influential in the planet, in the fields of technology, politics or economy.
- 2) Many tourists visit Spain every year. The majority of them can speak English.

- 3) Foreign languages are a convenient ingredient when you are looking for a job.
- 4) You can make more friends if you speak English, especially when you surf the Internet or visit the new social networks.
- 5) You can travel abroad and communicate easily when you speak English.

Think about the future and very possibly, you will find a good reason to study English... but start today! Don't wait until June!

See you!

Jaime Salvatierra Ruiz. IES El Coronil
